Define the Problem Statements

Date	03 October 2026
Team ID	SWTID-2026-8307
Project Name	**Auto Ticket Classification using Flow Designer**
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand the customer's point of view. The Customer Problem Statement template helps focus on what matters when designing an experience around the school IT helpdesk process.

A well-articulated statement captures who the customer is, what they are trying to achieve, the barrier they face, the reason for that barrier, and how the situation makes them feel.

I am	I'm trying to	But	Because	Which makes me feel
School IT helpdesk staff	Process incoming incident tickets	Manual category review takes time	Each ticket needs manual interpretation	Frustrated by repetitive work

Reference structure adapted from the supplied Customer Problem Statement template.

Problem Statements

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	School IT helpdesk staff	Classify incoming incident tickets into the correct category	I must manually review the Short Description and Description and assign a category	Tickets arrive with different wording, so each incident needs individual review	Frustrated by repetitive manual classification work
PS-2	School IT helpdesk staff	Classify common issues consistently	Similar Wi-Fi, projector, password/login, and slow-computer issues can require manual interpretation	Classification depends on recognizing relevant keywords in the ticket text	Concerned about inconsistent categorization

Project Context

Customer **School IT helpdesk staff**	**Current challenge** **Manual ticket review and category assignment consumes staff time and can lead to inconsistent classification.**	**Automation focus** **Use keywords from Short Description and Description to assign the relevant category.**
