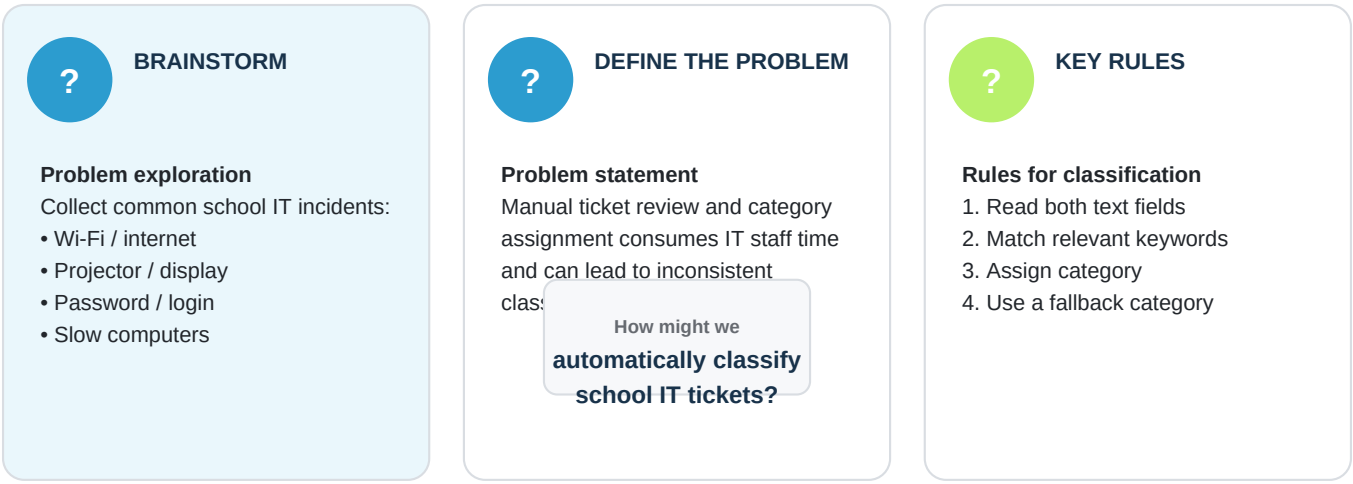
Ideation Phase
Brainstorm & Idea Prioritization Template

Date	03 October 2026
Team ID	SWTID-2026-8307
Project Name	**Auto Ticket Classification using Flow Designer**
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

The brainstorming phase identifies the school IT helpdesk problem, explores possible automation ideas, groups them into solution areas, and prioritizes the most feasible idea. The selected concept is an automated ServiceNow Flow Designer workflow that classifies incident tickets from keywords in the Short Description and Description fields.

Step-1: Team Gathering, Collaboration and Select the Problem Statement



Step-2: Brainstorm, Idea Listing and Grouping

Generate ideas that can reduce manual effort in the school IT helpdesk.

Brainstorm

Possible automation ideas for incident management:

Auto categorization
Assign category from ticket keywords

Auto assignment
Route tickets to the right support group

Priority detection
Flag urgent incidents for faster handling

Auto acknowledgement
Send confirmation to the requester

SLA monitoring
Track response and resolution targets

Knowledge suggestion
Suggest help articles for common issues

Group Ideas

Group related ideas into solution areas before selecting the project.

CLASSIFICATION

Keyword-based category assignment • Fallback category

WORKFLOW AUTOMATION

Auto assignment • Acknowledgement • SLA actions

INTELLIGENT SUPPORT

Knowledge suggestions • Priority detection

Step-3: Idea Prioritization

Compare ideas using Importance and Feasibility.

Reference structure adapted from the supplied brainstorming template; project content customized for ServiceNow.
