Project Development Phase

Model Performance Test

Date	08 October 2026
Team ID	SWTID-2026-8307
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Ticket Data Rendered	ServiceNow incident records are rendered with Short Description and Description fields used as classification inputs.
2.	Data Preprocessing	Text from Short Description and Description is combined and normalized for keyword matching before the Flow Designer logic is applied.
3.	Utilization of Classification Rules	Keywords such as Wi-Fi/network/internet, projector/display/screen, password/login/account, and slow/hanging/performance are matched to the relevant category.
4.	**Flow Designer Rules Used**	Flow Designer evaluates the incident text and assigns Network, Hardware / AV, Access / Password, or Performance / Computer based on matched keywords.
5.	Classification design	No of Classification Rules - 4
6	Report / Result Design	No of Output Categories - 4

Example Classification Rules:

Keywords	Category
Wi-Fi, network, internet	Network
Projector, display, screen	Hardware / AV
Password, login, account	Access / Password
Slow, hanging, performance	Performance / Computer
